Application/Control Number: 10/376,811

Art Unit: 1616

Applicant's election with traverse of Group I and w/o/w emulsions in the reply filed on 8/19/05 is acknowledged. The traversal is on the ground(s) that the emulsion does not require the particulate in any particular phase and that the method of using requires the claimed emulsion. This is not found persuasive because the claimed method requires addition of particulate to a particulate phase and the patentability of the method of use steps is not dependent upon the particular claimed composition.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 16, 18,19 are rejected under 35 U.S.C. 102(e) as being anticipated by Bara (US 6,548,850)

Bara teach multiple emulsions free of surfactant (column 5 lines 59-60). W/O/W emulsions are specified (column 5 line 55). Particulates as small as 0.1 micron are disclosed (column 7 lines 51-52). Cosmetic agents are specified (column 9 line 42).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

<sup>(</sup>a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/376,811

Art Unit: 1616

Claims 1-11, 16, 18, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bara in view of Gers-Barlag et al (US 2002/0077372).

Bara is discussed above. Bara further discloses inorganic particulate pigments and fillers (column 10 line 60 column 11 line 30).

Gers-Barlag et al teach that pigments less than 100 nm in size are advantageous as cosmetically and dermatologically acceptable (page 9 sentences 162-163).

Hydrophilized silicon dioxide pigments are specified (page 9 sentence 167). Mixtures including silicon dioxide are disclosed (page 9 sentence 161).

It would have been obvious to one of ordinary skill to use the pigments of Gers-Barlag et al in the composition of Bara to achieve the beneficial effect of cosmetic acceptability.

No claims allowed. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Webman whose telephone number is 571-272-0633. The examiner can normally be reached on M-F from 8 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Padmanabhan, can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Application/Control Number: 10/376,811

Art Unit: 1616

Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
